### DESCRIPTION

9081 SWIFT TRAINER: Made with premium KPU material for the upper makes for a hard wearing and durable safety trainer. The unique ergonomic fitting trainer offers the look and feel of an athletic trainer, without sacrificing any safety elements. Made with completely metal free components, this trainer uses a fibreglass toe cap for impact protection and a Kevlar midsole for puncture resistance. Comprised with an impact absorbent outsole, the materials create a solid barrier between the surface and the wearer to protect joints from falls and long periods on feet. The addition of the front scuff guard will ensure the longevity of the footwear. Manufactured in accordance with **ISO 9001 Quality Management** and **ISO 14001 Environmental Management** systems.
